

# DA301

**High security junction box**  
*With rear and lid-tamper switches*

*Fitted with anti-tamper switches to the rear and lid, this seam-welded steel unit provides a secure solution for important junction points. The tamper switches provide normally open and normally closed connections for optimum compatibility with any system, with the normally open and common contacts pre-wired with 100mm of grey wire for convenience. The lid is fitted with standard M4 x 10mm Pozi machine screws, which are easily replaceable with suitable security screws of your choosing.*

Switching contacts	
Voltage	Maximum 30V
Current	Maximum 3A
