

DA329

24-Way Junction box
with lid tamper switches

Fitted with an anti-tamper switch to the lid of this steel unit, it provides a secure solution for important junction points. The tamper switch provides normally open and normally closed connections for optimum compatibility with any system, with the normally open contacts (closed when the unit is mounted with the lid on) pre wired with 100mm of grey wire for convenience.

Contacts	
Voltage	Maximum 30V
Current	Maximum 3A
Connection type	Terminal block (2.5mm ²)
Connections	24 + Earthing point
Environmental	
Operating temperature	-10°C to +60°C
Storage temperature	-20°C to +70°C
Operating relative humidity	Maximum 95% non-condensing
Dimensions*	
Width	155mm
Height	208mm
Depth	55mm
Weight	< 1.1Kg
Enclosure material	Mild steel
Finish	Powder coated RAL9016 (White)
Other	
Tamper switch estimated operations before failure (MTBF)	100,000
CE Approved	Yes
Lid tamper	Yes
